

Sirs: K111 - Pete's ideas are NOT good, except for 75 and 10 meters.
I would support a realignment of 75/80 phone. 3700-4000 Extra, no change for
Advanced, 3800-4000 General and 3900-4000 Technicians.
3850-3900 Tech SSB will present problems. Please leave 40 meters General on up!!
It is too crowded. The other bands should stay as is. Novice-Tech+ subbands need
to be converted to phone. Techs could get General CW privileges on 80,40,and 15
meters. Please allow Techs to operate all digital modes from 28.0-28.3.to stop
pirates on the band!The phone band could be dropped to 28.2, but beacons would
have to shift down. Keep CW for General on up. Tom WB8WIV an "old " Extra.
